

Shanghai Polytechnic University Hired Three Academicians

On June 7, the first student academic forum and academician appointment ceremony of Shanghai Polytechnic University was held. Huang Chongqi, Academician of the Chinese Academy of Engineering and Chief Technical Director of Shenergy Group (Shanghai Cable Research Institute), Yang Weimin, Academician of the Chinese Academy of Engineering and President of Sinopec Shanghai Petrochemical Research Institute, Zhou Quanfa, foreign Academician of the Russian Academy of Natural Sciences, deputy party secretary and Vice President of Changzhou Institute of Technology. More than 400 people, including President Xie Huaqing, Heads of relevant departments and colleges, Deputy Secretary in charge of student affairs, representatives of teachers and students, attended the forum. The forum was presided over by Dong Lingli, Minister of the Ministry of Education (Research) and Director of the Student Affairs Office.

In his speech, Xie Huaqing encouraged the students to have curiosity in scientific research, insist on problem orientation, seek truth and be pragmatic, solve problems in a down-to-earth manner, acquire real skills, and experience the spirit of scientists from their predecessors through stories and cases of scientific research and academic style in his speech.

On June 7, the first student academic forum and academician appointment ceremony of Shanghai Polytechnic University was held. Huang Chongqi, Academician of the Chinese Academy of Engineering and Chief Technical Director of Shenergy Group (Shanghai Cable Research Institute), Yang Weimin, Academician of the Chinese Academy of Engineering and President of Sinopec Shanghai Petrochemical Research Institute, Zhou Quanfa, foreign Academician of the Russian Academy of Natural Sciences, Deputy party secretary and Vice President of Changzhou Institute of Technology. More than 400 people, including President Xie Huaqing, Heads of relevant departments and colleges, Deputy Secretary in charge of student affairs, representatives of teachers and students, attended the forum. The forum was presided over by Dong Lingli, Minister of the Ministry of Education (Research) and Director of the Student Affairs Office.

In his speech, Xie Huaqing encouraged the students to have curiosity in scientific research, insist on problem orientation, seek truth and be pragmatic, solve problems in a down-to-earth manner, acquire real skills, and experience the spirit of scientists from their predecessors through stories and cases of scientific research and academic style in his speech.

Academician Yang Weimin congratulated the outstanding academic achievements produced by our school's academic forum, and encouraged students to stand at the forefront of the times when choosing research directions, keep abreast of the pulse of the times, pay attention to reality and the future, and resonate with the development of the country and social progress.

We should cherish the opportunities of studying and researching at school, maintain our thirst for knowledge, be diligent in learning and thinking, and be practical in promoting the scientific spirit, always adhere to the awareness and bottom line of academic self-discipline, and clarify the dignity and sanctity of academic ethics.

In order to further promote our school's cultivation of top-notch innovative talents, improve the level of school discipline construction, promote open education, and cultivate high-level talents, the school specially hired Huang Chongqi, Yang Weimin, and Zhou Quanyuan as the school's "Chief Distinguished Professors". Mr. Zhou Quan awarded the "Chief Distinguished Professor" letter of appointment.

The forum revolved around the tracks of science "Learning", science "Creation" and science "Technology". A total of 1,087 works were received, and a total of 248 works were shortlisted for the final after preliminary review, college preliminary review, and school-level review, and finally 30 works Won the "Excellent Work Award". Academician Huang Chongqi and Academician Zhou Quanyuan awarded honorary certificates to the student representatives who won the outstanding works of the science "Science", science "Creation" and science "Technology" tracks.

At the scene, Professor Wang Lingling from the School of Energy and Materials, as a representative of excellent instructors, narrated the experience of instructing students in academic research, and encouraged the students through their own experience to shoulder the mission of the times and make outstanding contributions to the development and progress of society through scientific research; We must maintain a modest attitude towards learning, broaden our horizons, and expand our way of thinking; we must combine with practical problems and pay attention to social needs. After the first student academic forum and academician appointment ceremony, academician Zhou Quanyuan gave an academic report in the professional field. The teachers had face-to-face exchanges with academician Huang Chongqi, asked for advice on cutting-edge academic issues in the professional field, and explored new development directions in the field of subject competitions.

The launch of this academic forum has received the full support of all colleges, and the school-to-school linkage has built an interdisciplinary and diversified platform for academic exchanges, practical innovation and quality development for students. The forum focused on the national strategy of cultivating innovative talents, with the goal of comprehensively improving the quality of talent training, cultivating students' academic ability, and leading innovation and practice ability.

In the future, the school will continue to effectively explore the path of students' scientific ethics and style of study, integrate the cultivation of scientific ethics and the construction of style of study into the whole process of personnel training, and promote the core of "cultivating people by virtue" and "cultivating people in three aspects" and "five educations". The new pattern of comprehensive education of "simultaneous development" is to cultivate students' spiritual fertile soil, and strive to cultivate new talents of the era who can meet the needs of the country's future development and be worthy of the great task of national rejuvenation.

Shanghai Polytechnic University is an ordinary higher education institution in Shanghai that is good at engineering and manages the coordinated development of multiple disciplines in arts, sciences and arts. It focuses on undergraduate education and has the right to confer master's degrees unit. Shanghai Polytechnic University is a new type of university that continues to grow along with the socialist construction of New China. The school was formerly known as Shanghai Amateur University of Technology, which was established in 1960, and was renamed Shanghai University of Technology in 1984.
