

The **First** Lotus Venture Capital Science and Technology Achievement Transformation Forum in Beijing

Jin Qinxian, President of Beijing Tsinghua Institute of Industrial Development, said in his speech that the deep integration of the innovation system and the related industrial system not only requires the government to provide high-quality soil and environment for entrepreneurial enterprises, but also the participation of professional investment institutions. He believes that technological and professional venture capital is the most needed

link and traction rope for the next round of economic development, and that technology needs to be promoted by investment institutions in order to be transformed into productivity.

Lin Hang, Vice Mayor of Haidian District, pointed out that Haidian District has more than one-third of the city's national high-tech enterprises, Beijing's "specialized, special and new" small and medium-sized enterprises, and national "specialized, special and new small giants" enterprises.

She said that with the gradual improvement of the system and mechanism, Haidian District is willing to work with universities and institutes to help the construction of the Beijing International Science and Technology Innovation Center. And she expects that Lotus Venture Capital will continue to rely on the rich resources of Tsinghua University and other universities and institutes, and promote more major scientific and technological achievements to be transformed and landed in Zhongguancun Science City.

In the session of results transformation, Wang Yan, Director of Tsinghua University Technology Transfer Institute, introduced the technology transfer work of Tsinghua University. She said that Tsinghua University focuses on collaborative work in the innovation chain, builds a system of technology transfer and innovation ecology.

Mr. Zhu Ping, General Manager of Beijing Zhongguancun Science City Innovation Development Co., Ltd. introduced that Zhongguancun Science City Company is a science and technology industry investment service platform set up by Haidian District Government and serving the construction of Zhongguancun Science City.

He expressed his hope that through specialized investment and diversified services, combined with the park's space support, policy resources and market docking, we can jointly help enterprises grow healthily and create value in industrial development.

Mr. Zhang Shanxian, Managing Director of Lotus Venture Capital,

introduced that Lotus Venture Capital has invested in many typical science and technology innovation projects, with more than two-thirds of the projects dominating in their niche fields.

Through continuous empowerment and value-added services, Horton Ventures helps innovative companies develop and grow in the ecosystem. At the same time, it emphasizes asset management and strategic planning, and strives to make the transformation of scientific and technological achievements into series and scale, and will continue to explore and move forward on the road of transformation of scientific and technological achievements in the future.

It is understood that this forum is guided by the management committee of Zhongguancun Science City and jointly organized by Zhongguancun Science City Corporation and Lotus Venture Capital. As one of the organizers, Lotus Venture Capital was reorganized and established in 2014 under the strategic background of Tsinghua University to promote the transformation of scientific and technological achievements. It is a professional investment management institution with the main direction of early-stage investment in scientific and technological innovative enterprises. And it has invested in more than 70 high-growth innovative enterprises, and incubated about 30 high-quality scientific and technological achievements transformation projects from Tsinghua University and other colleges and universities as well as clinical experts.
