Wuhan University 130 Anniversary Celebration

On December 29, the Cherry Tree Top School History Hall was filled with a solemn and joyful atmosphere, and the 130th anniversary of Wuhan University officially kicked off. All university leaders, academicians, senior professors of humanities and social sciences representatives, the main responsible comrades of the secondary units, representatives of teachers and students,

alumni representatives, etc. attended the launch ceremony, the president of Wuhan University global local alumni associations, secretary general, etc. through the webcast online to watch the ceremony. And they witnessed this historic moment together. The launching ceremony was presided over by Huang Taiyan, executive deputy secretary of the Party Committee of the university.

Li Jiawen, an undergraduate student of the class of 2020, read out the Announcement of the 130th Anniversary of Wuhan University. The announcement summarized the 129-year history of Wuhan University,

"In more than a hundred years, the landscape has been flowing with the winds, and Mingcheng and Hongyi have shared their dreams and glory with the survival and rejuvenation of the nation, sharing the same destiny and advancing and retreating together"; it also summarized that "as the new era sets sail, Wuhan University takes the responsibility of seeking the well-being of mankind, promoting the progress of the society, and realizing the wealth of the country as its own mission".

On April 25, Ouyang Ziyuan, academician of the Chinese Academy of Sciences and "father of Chang'e", gave a lecture on "China's dream of exploring the moon" at the 232nd session of Lujia Lecture Theatre. Vice President Li Jiancheng issued a commemorative certificate of Lujia Lecture Theater. This activity was organized by the university and undertaken by Hubei Zishan Lake Aerospace Science and Technology Museum. In the report, Ouyang Ziyuan showed the progress of human lunar exploration with a lot of pictures and scientific exploration stories. He said that since the successful launch of China's first lunar probe satellite Chang'e-1 by Long March 3A carrier rocket in Xichang at 18:05 on October 24, 2007, Chang'e-3, Chang'e-4 and Chang'e-4, our country has paid a lot of effort to develop a new lunar exploration program. "Our country has made great efforts to become a space power with certain strength and status. Facing technological competition from other countries, China will need more innovative talents to devote to the space industry in the future.

He said that the 130th anniversary is an important initiative for Wuhan University to pay tribute to history, think about the present and plan for the future. To organize a school celebration to promote learning and encourage teaching, to guide the majority of teachers and students to further focus on the core elements of the development of Wuhan University; to organize a school celebration for teachers and students, to further cultivate and carry forward the spirit of Wuhan University throughout the university; to organize a school celebration shared by alumni, to bring together to promote the high-quality development of Wuhan University of a strong synergy.

"5, 4, 3, 2, 1!" In the countdown sound, party secretary Han Jin, President Zhang Pingwen, academician Gong Jianya of the Chinese Academy of Sciences, senior professor of humanities and social sciences Chen Chuanfu, teachers' representative Zhang Fan, students' representative Zhao Yilin and other six representatives jointly pressed the 130th anniversary of Wuhan University launching device. With the opening of the red pages of the book, the theme of "Self-strengthening Mission, Expanding New Horizons and Creating the Future" and the logo of the 130th anniversary of Wuhan University appeared in front of the eyes, marking the official launch of the 130th anniversary of Wuhan.
